Here's A Video About An Innovative Chicken Coop Design

We always like seeing different chicken coop design ideas

We like this video because it shows an innovative design for the chicken coop. The run through is a good idea and we also like the slide out metal plate for the floor of the coop.

That allows you to clean it easier. All the droppings and other mess just sit on top of the plate and you pull it out to clean it.

It's also very handy how the chook nesting box is so easily removed, and the trays on the floor of the nesting boxes also help with cleaning.

If you're making your own chicken coop try to incorporate some of these ideas into your hen house. They make sense and will make life easier.

Get stuck into building your own chicken coop with some of these ideas incorporated.
