Building Your Own Chook House

Provide your [chickens](#) a house

There are regular chook houses today that are available in the market. However, those commercially built chook house are very expensive and not everyone can afford it for their chicken. The good news is, you can build one yourself. Building your own chook house not only allows you to customize your [coop](#) to your own preference but also helps you save more money and gives you ease when it comes to giving enough space for the chickens.

Chook houses date as old as the Roman Empire and they come in several designs and structural variations. Most people prefer to build their own chook house which is much easier and cost-effective too rather than buying one. More so, there are lots of designs and styles you can look in the internet however, some of them don't say anything about the actual price. This makes it difficult for you to budget your money. When you build your own chook house, you can save lots of money especially when you plan to buy cheap materials but are of good quality. Most of these material works well like those made of expensive ones.

Before you can build your own chook house, there are several factors that you take into consideration. Firstly, it is important that you count the number of chickens you have to be placed inside the coop. figure out how they will grow as this determines the size of the choose house you are going to build. If your chickens are expected to get large, then you will need to plan a chook house that is big and has enough space for the large chickens to move about.

It is vital that the chook house has ample space for nesting and it should be sturdy too to with stand severe weather conditions. When you build a small chook house, suffocation and epidemic diseases can easily occur so it best to avoid this kind of situation. Make sure that you build a coop that is fairly close to your home so that you can check on it from time to time and you are sure they are safe from harmful elements.

As you are to build your own chook house, you should also remember that you have to provide them food. There are food dispensers you can find and there is also the automatic food dispenser that dispenses food in a time so it saves you the hassle from feeding them from time to time. Water is essential also, so there should be water always at the ready. Make sure that you change the water daily.
